OTA TRAVEL
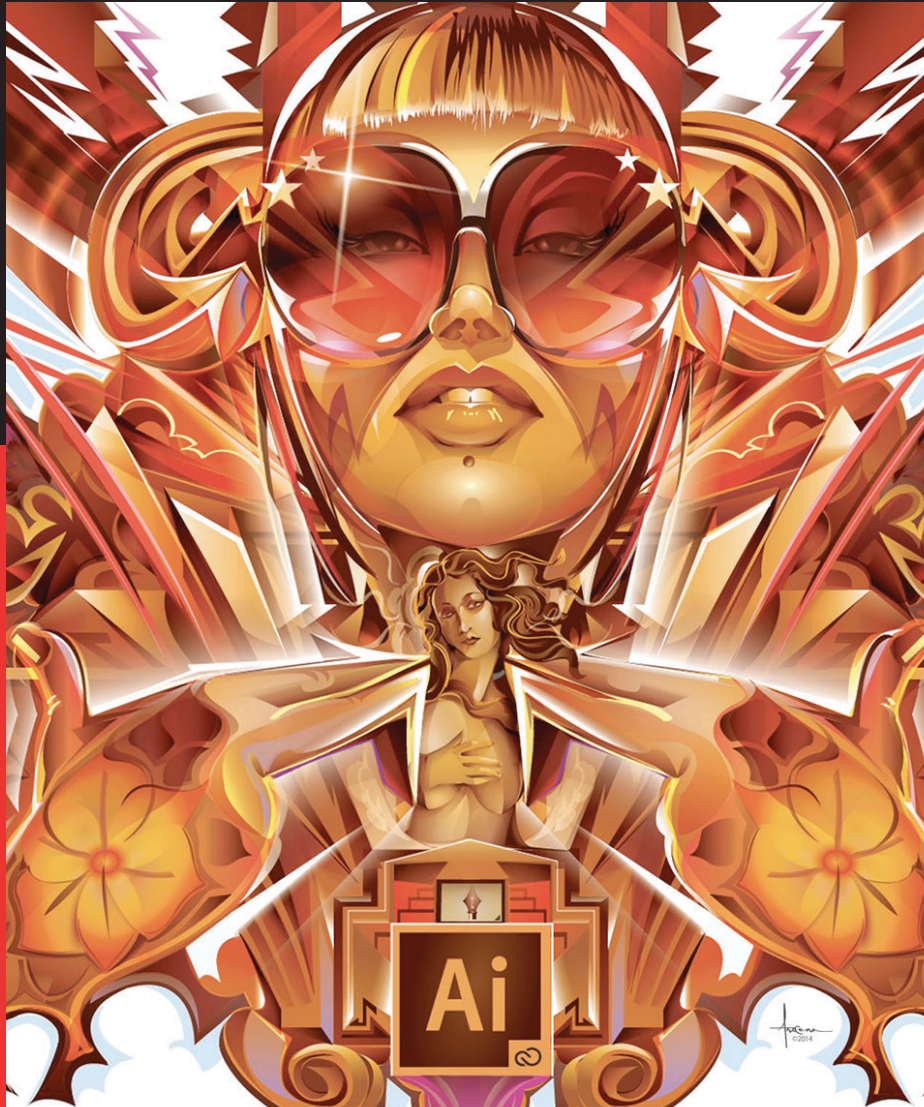

Adobe Illustrator 2021 is the world's leading vector-based drawing software that lets you release your creativity using its powerful tools like shapes, color, effects, and typography. This amazing software lets you create beautiful designs that can go anywhere across various media like print, web and apps, animations and more.
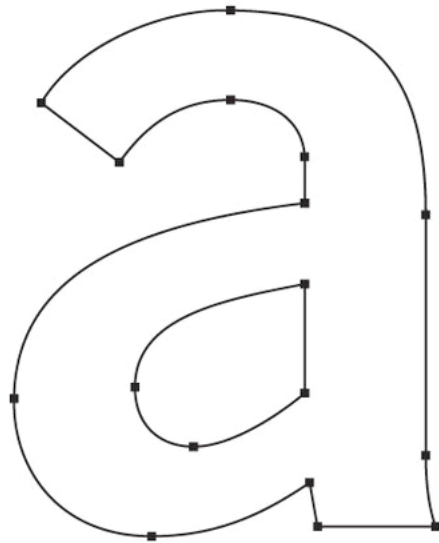

VECTOR-BASED GRAPHICS

mathematically-defined shapes created by lines that connect control points
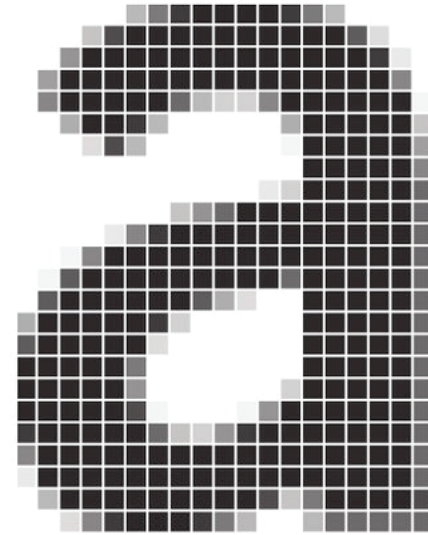

RASTER-BASED GRAPHICS
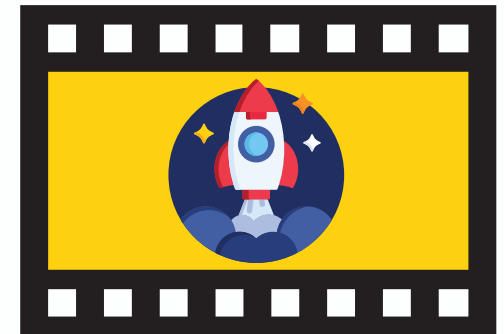

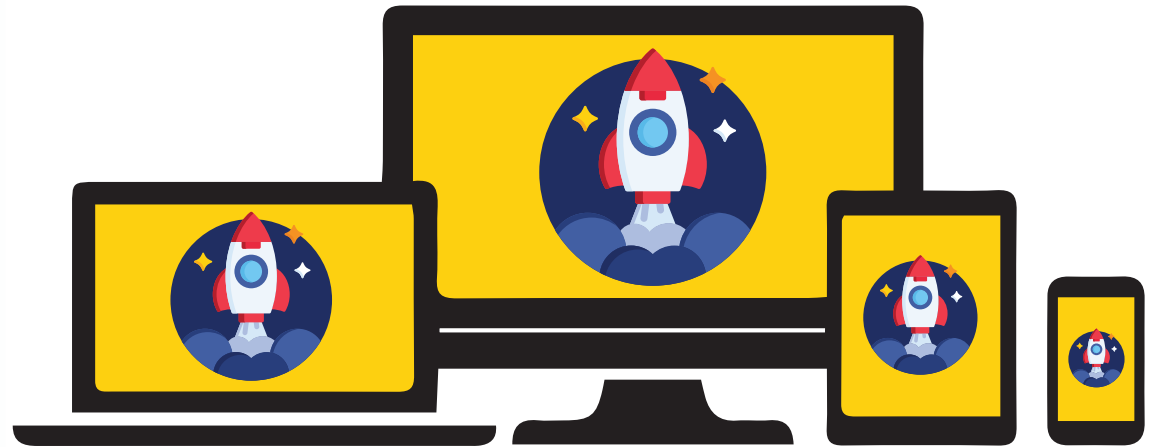

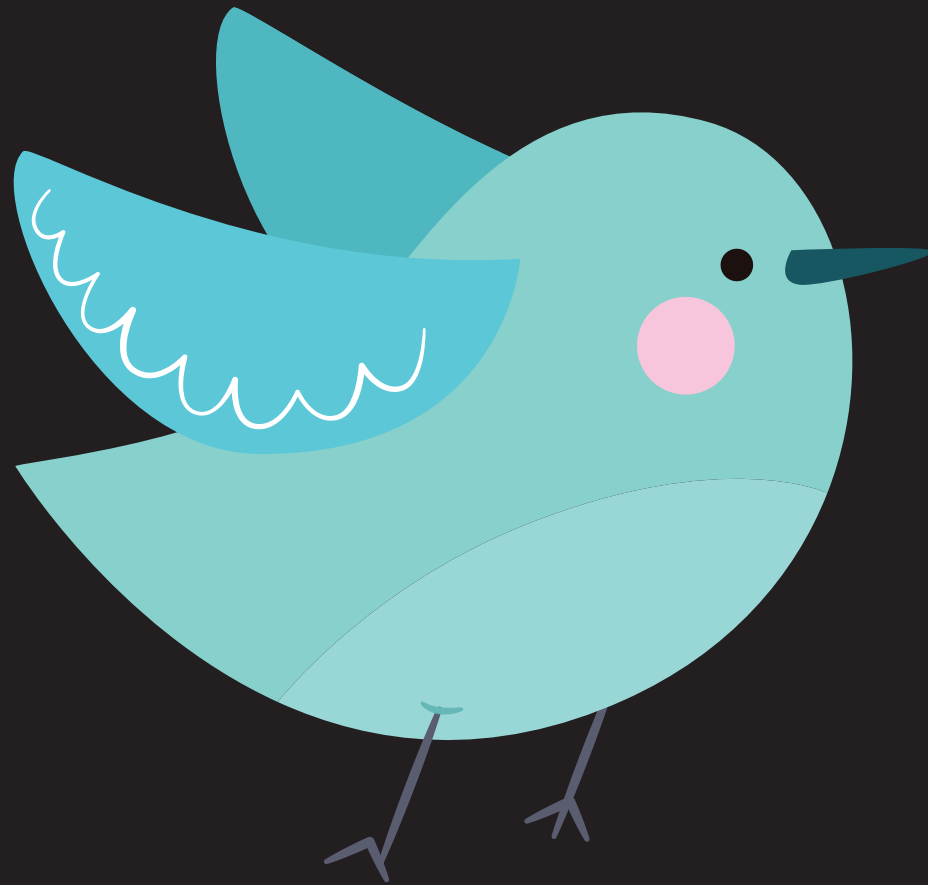

groups of pixels aligned on a grid that make up the image
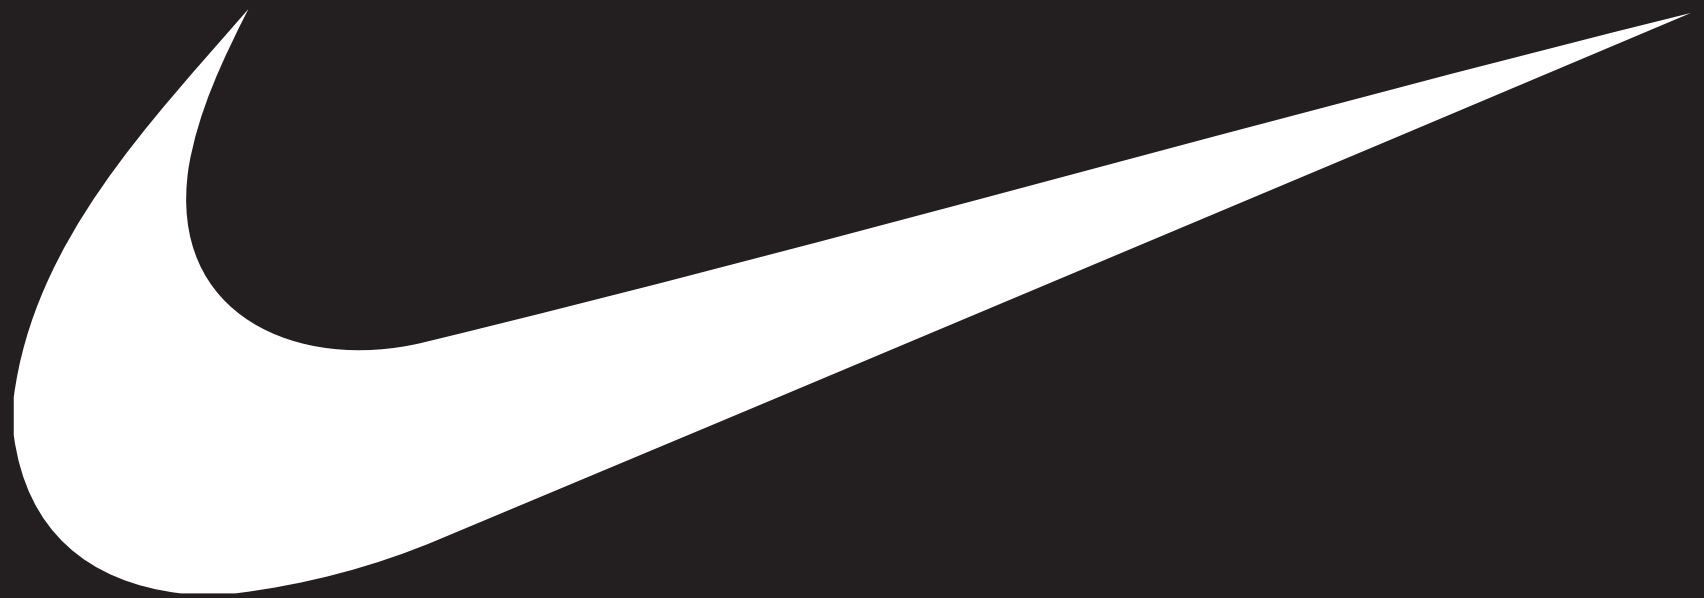

Digital Graphics: Vector vs Raster

Work across desktop and mobile devices and quickly create beautiful designs that can go anywhere: print, web and apps, video and animations, and more.

We will start with the techniques that you will need to **create just about anything in Illustrator**, including custom shapes, with the wonderful build shaper

or simpli to use the curvature tool

TURN CUSTOMERS
INTO HEROES AT WORK

We will explore lines and brushes

You will master how to **use and manipulate type**

We will work through how to **create your own custom logos and icons**

We will use our new type skills to make our one print flyer

KODAK FZ79   ACU 5502   11:469:222

Yoi will learn also how to push, pull, **cut and manipulate artwork** like this
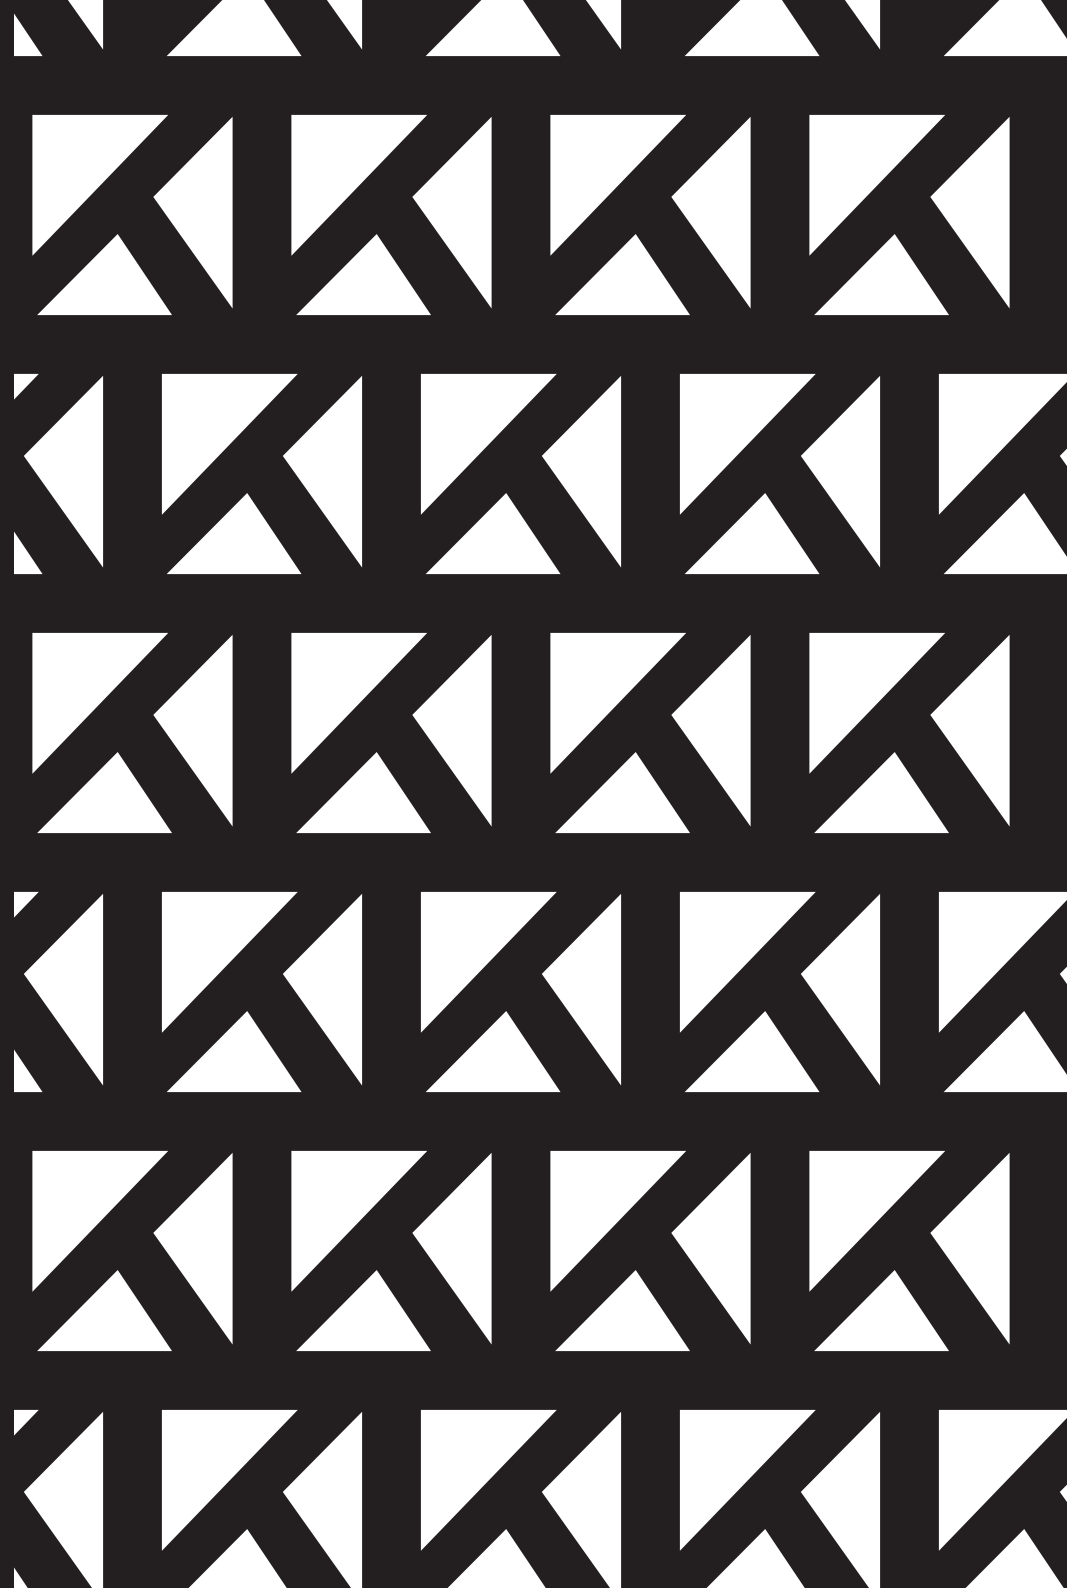

we will take our drawings and make **repetable patterns** like this

and I will easily show you how to redraw these images in vector style

We will learn about **color, gradients** and the wonderful world of **Pantone**

Last but not least, we will make sure that you can save and export your print and web documents like a professional and much more.
